

## HOMEOWNER PLUMBING AND ELECTRICAL AGREEMENT

\_\_\_\_\_  
Date

I, [PRINT NAME] \_\_\_\_\_, agree that it is my responsibility as the homeowner to ensure the plumbing in my home meets all state and local regulations and is adequate to support a connection to a new septic system or municipal sewer. I understand grant funds may only be used for the connection between my home and the new system. I agree to correct, at my own expense, all plumbing deficiencies, if required, prior to the repair/installation of the connection to the new septic system or municipal sewer.

I also agree it is my responsibility as the homeowner to ensure the electrical wiring in my home meets all state and local regulations and is adequate to support an outside connection for a grinder pump control box, if required. I understand these grant funds may *not* be used to upgrade or repair the existing electrical system. I agree to correct all electrical deficiencies at my own expense, if required, and to provide an outside electrical connection at my own expense prior to any grinder pump installation.

I understand that an Environmentalist employed by Jackson County Health Department will contact me to arrange a home visit to inspect my plumbing, home site, nearby waterways, and other relevant details. I also understand that a third-party contractor will be hired to repair/install the new septic system in accordance with the Environmentalist's evaluation.

I further understand and agree that the installation of a new septic system may result in the smell of sewer gas or other odors in my home if it lacks proper plumbing. I agree that it is my responsibility to make any repairs and/or changes necessary to eliminate odors caused by inadequate plumbing.
